PROFESSIONAL SUMMARY

Enthusiastic and motivated individual seeking a challenging opportunity as a Front-End Developer to utilize my skills in web development, HTML, CSS, JavaScript, and frameworks like ReactJS, with a passion for creating engaging user experiences.

SKILLS

HTML, CSS, JavaScript

ReactJS

UI / UX (Figma / Canva)

Java

SQL

EDUCATION

BTECH IN COMPUTER SCIENCE CANDIDATE, Hyderabad
Mahindra University, Expected graduation June 2024

PROJECTS

Web Development:

- Amazon Clone:** Developed a mini-Amazon clone using HTML, CSS, and JavaScript, featuring product listings, user authentication, and cart functionality, providing a simulated e-commerce experience akin to the renowned platform.
- YouTube Clone:** Created a YouTube clone with HTML and CSS, incorporating video playback, search functionality, and user interaction features, mirroring the interface and basic functionality of the popular video-sharing platform.
- Rotator Cube:** Designed and implemented a rotator cube using HTML and CSS, showcasing dynamic animation effects and user interaction, offering a visually engaging display reminiscent of a three-dimensional cube.

UI/UX:

- An intuitive astrology application providing personalized horoscopes, compatibility analysis, and recommendations based on individual birth charts. Designed to empower users with astrological insights for self-awareness and personal growth.
- Open Banking using Spring Boot:**
Developed an open banking system with Spring Boot and Java, facilitating secure financial transactions. Utilized Spring Boot for microservice development, ensuring scalability. Adhered to Open Banking standards, enabling interoperability. Implemented OAuth 2.0 authentication and JWT tokenization for robust security.
